policy relevant economic research on health care and health policy issues

nsa is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious inis database which began in 1970 nsa existed as a printed product volumes 1 33 initially created by doe s predecessor the u s atomic energy commission aec nsa includes citations to scientific and technical reports from the aec the u s energy research and development administration and its contractors plus other agencies and international organizations universities and industrial and research organizations references to books conference proceedings papers patents dissertations engineering drawings and journal articles from worldwide sources are also included abstracts and full text are provided if available

this biographical study illuminates one of the most important yet misunderstood figures in the history of science barbara mcclintock 1902 1992 a geneticist who integrated classical genetics with microscopic observations of the behavior of chromosomes was regarded as a genius and as an unorthodox nearly incomprehensible thinker in 1946 she discovered mobile genetic elements which she called controlling elements thirty seven years later she won a nobel prize for this work becoming the third woman to receive an unshared nobel in science since then mcclintock has become an emblem of feminine scientific thinking and the tragedy of narrow mindedness and bias in science using mcclintock s research notes newly available correspondence and dozens of interviews with mcclintock and others comfort argues that mcclintock s work was neither ignored in the 1950s nor wholly accepted two decades later nor was mcclintock marginalized by scientists throughout the decades of her alleged rejection she remained a distinguished figure in her field comfort replaces the mcclintock myth with a new story rich with implications for our understanding of women in science and scientific creativity
